SUMMARY

Software Engineer with 3 months of experience, specializing in front-end development and expertise in frameworks like **React**, **React Native** and **Figma**. Proficient in building full-stack Web & Mobile Applications and crafting intuitive, user-friendly interfaces.

EXPERIENCE

Web Intern / DevBunch - Lahore, PK (On-Site)

July 2024 - Sept 2024

- Enhanced skills in integrating user authentication with Firebase and managing user data with MongoDB, implementing CRUD functionality for client and product management, handling images with Cloudinary.
- Developed expertise in designing comprehensive systems for order management and financial tracking, including order processing, invoice generation, and virtual payment systems.
- Designed a user-centric UI for a food delivery app in Figma, creating intuitive workflows for rider, owner, and admin roles.

Social Media Manager - MUARKA, CAPDC, Comsats Lahore Debating Society

Feb 2023 - Jan 2024

- Created and scheduled engaging content, including posts, stories, and event updates, to build anticipation and increase attendance.
- Monitored and responded to audience engagement promptly, fostering excitement around the event.

PROJECTS

Website: Social Media App – MERN, Chakra UI

- Engineered a dynamic posting system allowing users to create and share posts, complete with photo uploads, providing a visually engaging platform for content sharing.
- Implemented comprehensive profile management features, enabling users to upload profile pictures, add bios, and personalize their profiles, social interactions including likes, comments in posts as well.

Website: ERP System – MERN, Tailwind CSS

- Integrated Google login with Firebase for authentication, automated user data storage in MongoDB, and implemented CRUD functionality for client and product management. Developed a virtual payment system, Client ledger, along with an order management system for invoicing, processing with cloudinary image support.

Mobile App: Readify: Inventory Management System – React-Native, Expo

- Developed a mobile application using Expo enabling users to manage clients, manage products, and create orders for multiple clients.
- Implemented an invoice generation feature with a professional design, including PDF download functionality for enhanced usability.

Website: PsyLink – Figma, TypeScript (Ongoing)

- Developing a mental health platform with anonymous therapy sessions, an AI-powered Vent Buddy, and a community for users to share experiences, ensuring anonymity and data security.
- Integrated appointment scheduling, calendar management, secure payments, video, voice, and chat sessions for interaction between patients and mental health professionals.
- Implemented tools for users, including mood tracking, therapeutic exercise monitoring, journaling, and prescription management for improved mental health care and progress tracking.

SKILLS

Technical Skills HTML | CSS | JavaScript | React-Native | React JS | TypeScript | Mongo DB | Express JS | Node JS | Spline | Figma | Tailwind CSS | Chakra UI | Git | Vite | Expo

Certificates HackerRank : React | Great Learning Academy : HTML, CS

EDUCATION

B.S. in Software Engineering | CUI- Lahore, PK

Sep 2021 - Present
